Communication

I have high mastery in customer service since I was 15 years old I am related to the 2 family businesses (plant nursery and cabins) sometimes I have been in charge, in addition to the fact that in my beauty field I have learned a lot about the psychology of each client and how to cope with each situation that arises, so that the customer is satisfied with the service.

I also have intermediate English learning, I can understand perfectly what people want to communicate to me, and when I want to communicate something to them I can on a conversational level but I have a facility to learn that language.
