Presentation

Tutor of teens and primary teacher leading pedagogical workshops to help the tutors to improve in their teaching skills, I have been an English teacher in schools and different educational institutions, dynamic, creative person with projection of professional growth and with the main objective of implementing leisure and educational activities on board with families for different ages. I am an experienced tutor working with children and teenagers, focusing on dynamic and engaging activities that help them learn English in an interactive way. My goal is to create a fun and immersive learning environment where students feel motivated and confident in their language skills.

I aspire to become a Teen Counselor, organizing meaningful activities for families and making a positive impact on young learners. In less than five years, I see myself growing into the role of Assistant Manager, taking on greater responsibilities and contributing to the development of educational programs.

My passion for education, strong leadership skills, and commitment to student success drive me to create enriching experiences that inspire both learning and personal growth.
